HACKATHON

Assam Floods 2026

THE HACKATHON IS GUIDED BY A SIMPLE BELIEF:
आपतकाल परखिए चारी, दुविधा कस मीच अरु नारी
(A FRIEND IN NEED IS A FRIEND INDEED)

PROJECT Title

Selected Theme

Team Name

01 Problem Statement 1:
**CROPLAND UNDER WATER —
PARCEL-SCALE CROP DAMAGE AND
COMPENSATION INTELLIGENCE**

Map flood impacts on agricultural parcels,
identify damaged crops, and generate
compensation-ready intelligence.

02 Problem Statement 2:
**REFUGE OR RISK —
NEAR-REAL-TIME FLOOD INTELLIGENCE
FOR WILDLIFE AND PROTECTED AREAS**

Monitor inundation in protected areas, wildlife
habitats, and refuges to support rescue,
protection, and habitat restoration.

03 Problem Statement 3:
**WHO IS CUT OFF —
FLOOD DAMAGE AND ACCESSIBILITY
MAPPING FOR SETTLEMENTS AND
LIFELINE INFRASTRUCTURE**

Identify flooded settlements, damaged infrastructure,
and cut-off areas to support relief planning
and restore connectivity.

BASIC Information

Summary

Briefly describe the problem

Study Area

Mention the geographic location studied (state/district/basin/etc) and why it is relevant to the selected disaster.

Method

Briefly describe the steps or approach used to analyze the data (e.g., time-series analysis, mapping, comparison).

Data

List the main datasets used along with their source.

Results

Maps

Charts & Statistics

Highlight the main takeaway and its relevance to understanding or managing floods.
